WORKSHOP ACCESS TO (EXPENSIVE) MEDICINES IN EUROPE

Venue: Erasmus University Rotterdam

Date: 20 February 2026

Coordination:

André den Exter (Erasmus University Rotterdam)

Joaquín Cayón (IDIVAL-University of Cantabria)

Access to expensive medicines is a significant challenge that can be addressed through strategies like government reimbursement systems, price negotiations between governments and manufacturers, and promoting biosimilars. Other key approaches include improving pharmaceutical supply systems, strengthening regulatory bodies, challenging excessive price-setting by the judiciary, and encouraging the rational use of medicines by healthcare providers.

During this one-day meeting, international experts will address access to high-cost medicines from different perspectives (law, medicine, pharmacology, economics, and ethics) and discuss the impact of the European pharmaceutical strategy on access to expensive medicines.
